

Dear Valued Client:

15 February 2016

The purpose of this email is to introduce Brownie's Global Logistics, LLC, doing business as "GlobalSubDive.Com", a turnkey submersible exploration organization based in Fort Lauderdale Florida, headed up by Robert Carmichael. GlobalSubDive operates a modern, 45-meter, dynamic position equipped, Research Vessel "Baseline Explorer" specifically configured to support multiple submersibles, ROVs, AUVs, technical dive teams, large tenders and deck equipment. Stability, exacting control, station keeping in all water depths, long-range, heavy-lift, 360-degree bridge view, front and rear control stations and 24-berths are but a few of the highlights that make the Baseline Explorer ideal for submersible support and exploration.

The company operates a pair of Triton 1000/2 submersibles in affiliation with "Global Underwater Explorers" investigating and documenting the underwater world to the benefit of "Project Baseline.org". These efforts include collaboration with a wide range of private and university researchers in nearly every marine based discipline. The diversity of research efforts integrating our Triton submersibles combined with the modern ship technologies, specialized tenders, and dive support facilities makes this an ideal venue to showcase the value and benefits of human-occupied-vehicles (HOV/ Submersibles). We are inviting our valued clients and those considering a submersible to participate in a scheduled GlobalSubDive event as a sponsor or develop your own agenda and let Triton and GlobalSubDive plan and execute your adventure.

R/V "Baseline Explorer" is available for short or long-term charters and experience based training for submersible pilots, engineers, deck, and surface support crew. GlobalSubDive also offers the full range of "Global Underwater Explorer" Rebreather, SCUBA, DPV, Documentation Diver, Deco-Chamber, Dive Machinery Operations / Maintenance, training in real-world exploration environments.

Baseline Explorer and the submersibles package are offered at competitive rates with the goal of providing both existing and prospective submersible owners and operators with a capable, convenient and efficient turn-key platform for expeditions of any kind, supplemental training to augment operational experience and review the latest in exploration equipment and procedures.

To learn more about this organization and their specific capabilities, please click on the following link; <http://globalsubdive.com>

TRITON SUBMARINES, LLC

Tel: 1-772/770-1995 • Fax: 1-772/770-1395

Further, Triton Submarines is assisting in the development of a novel training curriculum, titled "The Fundamentals of Submersible Operations and Piloting (FSOP)". We recognize GlobalSubDive has the capability to efficiently provide abundant real- world experiential training before and after the Triton "unit specific" factory course and the complimentary benefits of the FSOP program. As the popularity of submersibles expands in the yachting industry the benefits of the FSOP program for initial and continuing education will become very apparent and we are pleased to be part of the development and implementation of this program.

We would be pleased to assist you with any part of coordinating a charter, exploration partnership or apprentice-thru-expert level training with Triton and our friends at GlobalSubDive.com

Please don't hesitate to contact us if you have any questions. Thanks for your time and consideration.

Sincerely,

Patrick Lahey
