Private R/V Baseline Explorer Entered Service 2015

"DP-1" Dynamic Positioning provides precise station keeping in deep water and advanced launch and retrieval of tenders and machinery in the open ocean

Cruising Speed 11 knots

65 gph average

Length 45 m

Beam 11 m

Clear Deck 21 m x 8 m (631 sq m)

2 Cummins K38M Tier 2 Engines

24 Berths

Fuel Capacity 77,550 gal

Fresh Water Ballast

Project Baseline

The conservation initiative started by the non-profit organization Global Underwater Explorers to transform divers into citizen scientists who collectively create a perpetual visual record of underwater conditions across the world that is shared with the public via the internet.

The Baseline Explorer program was established to foster this mission by pairing the world's most capable volunteer divers with observation submersibles aboard a vessel tailored to engage collaborative scientific and conservation projects anywhere in the Atlantic Ocean and its bordering seas.
